Full stack web developer with a passion for improving the world using tech.

- With experience in: **HTML, S/CSS, JavaScript, React.js, Node.js, PHP, SQL, and Laravel.**
- Little experience in: **C/C++, .Net, and WordPress.**

I hold a Bachelor's degree in Information Technology and have a track record of working with teams to develop user-friendly websites. I'm looking for a position that challenges my technical skills, in a company that is visionary and growth-oriented.

## Experience

**NestorX** – [Company Profile Link](#)

2021

### Frontend Developer

- Used React and Material-UI library to build the dashboard of the configurations system that we build.
- Used git/GitLab for all code version control.
- Used Google Meet for all the video communication, because the work is all remotely, and Slack for the text communication.
- All communication was in English (either text or video meeting) because the team was multinational, from Yemen, US, Canada, and Pakistan.
- Used agile methodology (specifically SCRUM framework), with all its stages like daily meetings, sprint meetings, etc.

## TECHNICAL PROJECTS

**Findme** - [Github](#) | [Demo](#)

*a service that connects lost people with those searching for them.*

- Built with React.js, S/CSS styling with Tailwind CSS framework.
- Used Jest framework for unit testing (snapshot testing).
- Used Firebase for backend and database (user authentication using OAuth protocol, posts, 'Contact Us' form).
- Used CircleCI for continuous integration.
- Led a team of 6 using agile methodology (specifically SCRUM framework), Git/GitHub for source control, and Zoom for video conferencing.
- Used Netlify for hosting.

**watheq.xyz** - [Github](#) | [Live Site](#)

*My personal blog.*

- **(Previously)** Built the blog from scratch using raw PHP and MySQL database. Here is [the previous code](#) in PHP/MySQL.
- **(Now)** Developed by Gatsby React static site generator, using markdown to format posts, GraphQL for the queries.
- It has a progressive web app (PWA) feature so the users can download the site and watch it locally offline.
- Continuously updated with the amazing integration between GitHub and Netlify, so what is added to the GitHub repository it is published automatically.

**Web Pages from Mockups** - [Github1](#) | [Demo1](#) | [Github2](#) | [Demo2](#)

- Built using raw HTML, CSS, and JavaScript.
- Responsive design: mockups work on desktop, tablet, and mobile.
- Used BEM class name convention for structuring the styles in a reusable format.

## EDUCATION

**Re:Coded Bootcamp** ([Re:Coded](#) + [Flatiron School](#))

2020

- Front End Web Development (HTML, CSS, JavaScript, React).
- 5 months of intense web development program run by Re:Coded with Flatiron School's curriculum.
